DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fifth washer in claim 30 and the sixth washer in claim 31 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. New formal drawings are required in this application because they help to understand the Specification better. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The formal drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for formal drawings will not be held in abeyance.

Specification

3. The Specification is objected to under 37 C.F.R. 1.71 for not disclosing clearly the role of the pinheads 37 in the embodiment in Fig. 5. Paragraph [0050] on page 12 discloses that the saw blade 27 rests on the two pinheads 37. It is unclear how the saw assembly can function as the saw blade rests on the two pinheads 37. The saw blade

would not be sturdily mounted to the washer 26a and there is not enough retaining force between the washer 26a and the saw blade which makes the saw blade to rotate as the arbor rotates.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The saw assembly could not function properly as the saw blade rests on the pinheads 37.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 31-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 31, the second washer is the second blade collar as claimed in claim 27; therefore, it is unclear how the sixth washer could be interposed between the second washer and the second blade collar.

Allowable Subject Matter

8. Claims 1-10, 12-30 and 34-47 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clarke (4,641,562), Held (3,613,472), Van Steenberg et al.
